

VISA FORTE

ENGINEERED FOR PASSAGE.

Brand Identity Standards

Edition 1.1 · Prashant Thirthingoth · visaforte.com

or · Brand Essence

What Visa Forte is.

The practice does not sell hope. It engineers passage. Every brand decision — mark, colour, typeface, tone — is derived from this single statement.

BRAND PERSONA

The most knowledgeable colleague in the room — completely calm, completely authoritative, completely on the client's side.

POSITIONING

Premium Canadian immigration documentation consultancy based in Secunderabad, India. 20+ years of domain expertise. Output: McKinsey-quality guidance at human scale.

THE TAGLINE

Engineered for Passage.

Engineered

Not guided, not helped, not assisted. Engineered. The word carries precision, process, and mastery. It removes hope from the equation and replaces it with methodology.

Passage

Not arrival, not immigration, not relocation. Passage — the threshold moment, the crossing. It is architectural and timeless, free of bureaucratic language.

BRAND VALUES

Authority

Earned through two decades of documentation expertise. Never asserted — demonstrated.

Precision

Every word, every document, every proportion is deliberate. The mark's ratios are not decorative — they are architectural constants.

Calm

Immigration is stressful. The brand is not. Prussian and Pearl are the colours of settled intelligence, not urgent action.

02 · The Mark

The Threshold.

A portal reduced to its structural grammar: lintel, two columns, and the passage between them. It is the moment before crossing — held breath before the gate opens.

ANATOMY

PROPORTIONS

4 : 5

Width to height ratio

1 : 2

Column to passage ratio

30%

Lintel height of total

2 u

Saffron accent height

WHAT IT ENCODES

- A portal at the moment of threshold — the held breath before passage begins.
- The saffron accent is the keystone: the compressed point where the arch holds and passage becomes possible.
- No immigration iconography. No maple leaf, no globe, no stamp. The form earns its meaning without explanation.

MARK AT KEY SIZES

Favicon · 16px

App icon · 24px

04 · Digital Nav Logo

Transparent white variant.

Three viewport-optimized SVGs render on the Prussian navigation bar: `logo-nav-desktop.svg` at $\geq 860\text{px}$, `logo-nav-tablet.svg` at $\leq 860\text{px}$, and `logo-nav-mobile.svg` at 375px . The mark and wordmark are pure white; only the saffron keystone accent and the separator rule retain their brand colour. The background is fully transparent.

DESKTOP · $\geq 860\text{PX}$ height: 42px · width: auto

TABLET · $\leq 860\text{PX}$ height: 40px · width: auto

MOBILE · 375PX height: 40px · width: auto

FILE SPECIFICATION

- ↓ TABLET SVG
- ↓ MOBILE SVG

Only use on Prussian or dark backgrounds. Never on Pearl or white.

05 · Colour

Prussian and Pearl dominate. Saffron sharpens.

Saffron is a precision instrument, not wallpaper. It appears as a single accent: the keystone line in the mark, the separator rule in the lockup, the period in the tagline. Never as a dominant fill.

PRIMARY · DOMINANT	ACCENT	GROUND · BREATHING ROOM
Forte Prussian	Forte Saffron	Forte Pearl
HEX #0C2340	HEX #C97B1E	HEX #F8F4EE
RGB 12 · 35 · 64	RGB 201 · 123 · 30	RGB 248 · 244 · 238
CMYK 81 · 45 · 0 · 75	CMYK 0 · 39 · 85 · 21	CMYK 0 · 2 · 4 · 3
PANTONE = 289 C	PANTONE = 1245 C	PANTONE = 9180 C

Pantone values are nearest matches. Verify against physical swatch before commissioning print work.

COLOUR USAGE HIERARCHY

Dominant (≥ 60%)	Supporting (≥ 30%)	Accent (≤ 10%)
Forte Prussian is the authority surface. Primary backgrounds, the mark, wordmark, and body copy all default to Prussian.	Forte Pearl is breathing room. It is the ground on which Prussian elements sit. Light backgrounds, paper, card stock.	Forte Saffron is used exactly three times: the keystone line in the mark, the separator rule, and the period. Never as a background fill.

o6 · Typography

Two typefaces. One hierarchy.

Cormorant Garamond for authority and weight. DM Sans for clarity and precision. They are never used interchangeably — each has a defined role.

PRIMARY · WORDMARK & HEADINGS

Light 300	Background decoration only
Regular 400	Body headings, pull quotes
Medium 500	Wordmark, section titles
SemiBold 600	Emphasis only

SECONDARY · BODY & UI

Light 300	Body text, tagline, captions
Regular 400	UI labels, navigation
Medium 500	Buttons, calls to action

TYPE SCALE IN USE

H1 · 48px	Engineered for Passage
H2 · 32px	Document Strategy
H3 · 22px	Express Entry · CRS Assessment
Body · 14px	Your eligibility is assessed against current IRCC criteria and verified against canada.ca.
Label · 8px	SECTION HEADER · DOCUMENT REFERENCE

07 · Usage Rules

Clear space. Minimum size. What not to do.

CLEAR SPACE

Maintain a minimum clear space around all lockups equal to the height of the threshold mark's lintel. No other element — text, image, line, edge — may enter this zone.

MINIMUM SIZES

Primary horizontal lockup	min 160px / 42mm
Primary stacked lockup	min 80px / 21mm
Secondary lockup	min 120px / 32mm
Threshold mark alone	min 16px / 4mm

WHAT NOT TO DO

 × DON'T STRETCH Never scale the mark non-uniformly. The 4:5 ratio is an architectural constant.	 × DON'T FILL WITH SAFFRON Saffron is never a dominant fill. The mark is always Prussian or Pearl.	 × DON'T ROTATE The mark must always sit vertically. It is a standing gateway, not a decorative element.
 × NO DROP SHADOWS No shadows, glows, or embossing effects. The mark relies on form, not effects.	 × NO GRADIENTS Never place the logo on gradient backgrounds. Use only Prussian, Pearl, White, or Black.	 VISA FORTE × DON'T RECREATE Always use the provided SVG files. Never retype or recreate the wordmark in any other application.
